WEB-BASED THESIS ARCHIVING SYSTEM

A Quantitative Case Study in St. Cecilia's College – Cebu, Inc.

Presented by Group 1

Objective

- To develop and evaluate a web-based thesis archiving system that improves the accessibility, organization, and management of student theses within the institution.

RESEARCH DESIGN

CASE STUDY

WHY IT IS USED IN OUR STUDY?

- Focuses on St. Cecilia's College – Cebu, Inc.
- Examines the real manual archiving system and its challenges.
- Ensures the web-based system is tailored to the institution's workflows.
- Combines contextual understanding (qualitative insights) with numerical evidence (quantitative survey).

RESEARCH APPROACH

Mixed Methods (Quantitative + Qualitative)

WHY IT IS USED IN OUR STUDY?

- Combines numerical data and user feedback
- Supports statistical analysis and qualitative insights
- Provides comprehensive evaluation of system needs
- Strengthens justification for system development

RESEARCH INSTRUMENT

Structured Questionnaire

- Respondent profile
- System evaluation criteria (Usability, Functionality, etc.)
- Likert scale questions
- Open-ended feedback

POPULATION

- 1,653 students (3rd and 4th year students involved in thesis process)
- Research advisers of the institution

TOTAL SAMPLE SIZE

- 182 Respondents (Students)
- 8 respondents (Research Adviser)

STUDENTS POPULATION

DEPARTMENT	POPULATION
EDUCATION	328
CRIM	265
BSBA	375
BSHM	332
BSIT	260
BSTM	93
TOTAL POPULATION:	1653 STUDENTS

SAMPLING TECHNIQUE

STRATIFIED SAMPLING

- Stratified sampling was used to ensure proper representation of different departments and roles within the population.
- The population was grouped into relevant strata, and participants were selected from each group to reduce sampling bias and improve the accuracy of the results.

Student Respondents

- Stratified sampling was used to select student respondents. The student population was grouped according to their respective departments. Participants were then selected from each department to ensure proper representation across all groups.

Faculty/Research Faculty Respondents

- Stratified sampling was also applied to faculty respondents. Faculty members were grouped according to their departments. From each department, participants were selected based on voluntary participation to ensure representation while considering availability and willingness to participate.

STUDENTS SAMPLE SIZE

DEPARTMENT	SAMPLE
EDUCATION	36
CRIM	29
BSBA	41
BSHM	37
BSIT	29
BSTM	10
TOTAL SAMPLE SIZE:	182 students

RESEARCH ADVISER'S SAMPLE SIZE

DEPARTMENT	POPULATION
EDUCATION	2
CRIM	1
BSBA	2
BSHTM	1
BSIT	2
TOTAL SAMPLE SIZE:	**8 Research Adviser**

ETHICAL CONSIDERATION

Informed Consent

- Respondents will be informed to the purpose of the study before participating.

Voluntary Participation

- Respondents will have the freedom to refuse or withdraw at any time.

Data Privacy

- Compliance with the Data Privacy Act. All responses will be anonymized and used solely for academic purposes.

Thank You
