Data Collection and Analysis Procedure

Data were collected through the use of structured questionnaires distributed to selected student and faculty respondents after securing approval and permission from the institution. Formal authorization was obtained from the deans and department heads to ensure proper coordination and ethical compliance prior to conducting the survey.

For the student respondents, stratified sampling was used to ensure proper representation across different departments. Students were grouped according to their respective departments, and respondents were selected from each group to ensure balanced participation. The questionnaires were distributed physically and through online platforms depending on respondent availability, and sufficient time was provided for completion. The collected responses were then encoded and prepared for analysis.

For the faculty respondents, stratified sampling was also applied based on department and role. Participation was voluntary, and only faculty members who agreed to participate and met the study criteria were included in the survey. This approach ensured representation while considering availability and willingness to respond.

After data collection, responses were organized, tabulated, and analyzed using descriptive statistical tools. Frequency and percentage were used to analyze demographic data, while weighted mean was used to interpret Likert-scale responses and evaluate the level of agreement regarding the system. The analyzed data were interpreted to support the evaluation of the developed system and determine its effectiveness.

STUDENT QUESTIONNAIRES

Part I: Respondent Profile

1. Which of the following roles best describes you?
   ☐ Student
   ☐ Research Instructor
   ☐ Department Coordinator
2. Which department do you belong to?
   ☐ BSIT
   ☐ BSEED
   ☐ BEED
   ☐ BSCRIM
   ☐ BSBA
   ☐BSHTM

3. Have you ever used Google Drive or any other online document storage service?
   ☐ Yes ☐ No
4. How many hours per day do you use the internet?
   ☐ less than 1 hour ☐ 1-3 hours ☐ 4-6 hours ☐ 6 hours above
5. Do you prefer viewing theses in a web-based archiving system?
   ☐ Yes ☐ No
6. Do you prefer students to upload their theses online?
   ☐ Yes ☐ No
7. Should the system track who downloaded the thesis?
   ☐ Yes ☐ No

Part II: Perceptions on a Web-Based Thesis Archiving System

Instructions:

Please indicate your level of agreement with each of the following statements by selecting the appropriate response.

Scale:

1– Strongly Disagree

2 – Disagree

3 – Neutral

4 – Agree

8. Using digital thesis archiving enhances the protection of research papers from physical damage or loss while improving accessibility.
   ☐– Strongly Disagree ☐– Disagree ☐– Neutral ☐– Agree ☐– Strongly Agree
9. I am concerned that my thesis could be plagiarized- if uploaded to an online system.
   ☐– Strongly Disagree ☐– Disagree ☐– Neutral ☐– Agree ☐– Strongly Agree

10. The system should include built-in plagiarism detection and protection features.
    ☐– Strongly Disagree ☐– Disagree ☐– Neutral ☐– Agree ☐– Strongly Agree
11. To what extent do you agree that a web-based system would reduce the time spent searching for thesis documents?
    ☐– Strongly Disagree ☐– Disagree ☐– Neutral ☐– Agree ☐– Strongly Agree
12. Access to full thesis contents should be restricted to authorized users only.
    ☐– Strongly Disagree ☐– Disagree ☐– Neutral ☐– Agree ☐– Strongly Agree3
13. The system should provide approval notifications and allow users to view comments and revision requests.

    ☐– Strongly Disagree ☐– Disagree ☐– Neutral ☐– Agree ☐– Strongly Agree

FACULTY QUESTIONNAIRES

Part I: Respondent Profile

1. Which of the following best describes your role?

☐ Student

☐ Research Instructor

☐ Department Coordinator

2. Which department do you belong to?

☐ BSIT

☐ BSED

☐ BSCRIM

☐ BSBA

☐ BSHTM

☐ BEED

Part II: Perceptions on a Web-Based Thesis Archiving System

Instructions:

Please indicate your level of agreement with each of the following statements by selecting the appropriate response.

Scale:

1– Strongly Disagree

2 – Disagree

3 – Neutral

4 – Agree

5 – Strongly Agree

3. Do you prefer students to upload their theses online?

☐– Strongly Disagree ☐– Disagree ☐– Neutral ☐– Agree ☐– Strongly Agree

4. Relying solely on hardbound copies without a backup system makes thesis data vulnerable to loss or damage limits accessibility.

☐– Strongly Disagree ☐– Disagree ☐– Neutral ☐– Agree ☐– Strongly Agree

5. Implementing a web-based thesis archiving system improves the organization of records.

☐– Strongly Disagree ☐– Disagree ☐– Neutral ☐– Agree ☐– Strongly Agree

6. Role-based access control should be implemented in the system to manage user permissions.

☐– Strongly Disagree ☐– Disagree ☐– Neutral ☐– Agree ☐– Strongly Agree

7. The system should provide submission notifications and support revision requests and comment feedback.

☐– Strongly Disagree ☐– Disagree ☐– Neutral ☐– Agree ☐– Strongly Agree

RAW DATA PER DEPARTMENT (STUDENTS)

Question 3: Have you ever used Google Drive or any other online document storage service?

DEPARTMENT	YES	NO	TOTAL
BSIT	28	1	29
EDUCATION	33	3	36
BSBA	41	0	41
BSCRIM	29	0	29
BSHTM	47	0	47

QUESTION 4: How many hours per day do you use the internet?

DEPARTMENT	Less than 1-hour	1-3 hours	4-6 hours	6 hours above	TOTAL
BSIT	4	10	10	5	29
EDUCATION	3	7	8	18	36
BSBA	10	22	3	6	41
BSCRIM	3	15	5	6	29
BSHTM	9	16	12	10	47

Question 5: Do you prefer viewing theses in a web-based archiving system?

DEPARTMENT	YES	NO	TOTAL
BSIT	25	4	29
EDUCATION	23	13	36
BSBA	37	4	41
BSCRIM	26	3	29
BSHTM	39	8	47

Question 6: Do you prefer students to upload their theses online?

DEPARTMENT	YES	NO	TOTAL
BSIT	26	3	29
EDUCATION	27	9	36
BSBA	36	5	41
BSCRIM	25	4	29
BSHTM	30	17	47

Question 7: Should the system track who downloaded the thesis?

DEPARTMENT	YES	NO	TOTAL
BSIT	27	2	29
EDUCATION	21	15	36
BSBA	39	2	41
BSCRIM	23	6	29
BSHTM	40	7	47

Question 8: Using digital thesis archiving enhances the protection of research papers from physical damage or loss while improving accessibility.

DEPARTMENT	STRONGLY DISAGREE	DISAGREE	NEUTRAL	AGREE	STRONGLY AGREE	TOTAL
BSIT	0	0	8	16	5	29
EDUCATION	0	0	16	17	3	36
BSBA	1	6	10	14	10	41
BSCRIM	0	0	14	13	2	29
BSHTM	0	1	22	22	2	47

Question 9 : I am concerned that my thesis could be plagiarized- if uploaded to an online system.

DEPARTMENT	STRONGLY DISAGREE	DISAGREE	NEUTRAL	AGREE	STRONGLY AGREE	TOTAL
BSIT	0	0	8	14	7	29
EDUCATION	0	3	11	14	8	36
BSBA	0	5	8	22	6	41
BSCRIM	0	0	19	8	2	29
BSHTM	1	10	18	17	1	47

Question 10: The system should include built-in plagiarism detection and protection features.

DEPARTMENT	STRONGLY DISAGREE	DISAGREE	NEUTRAL	AGREE	STRONGLY AGREE	TOTAL
BSIT	0	1	5	14	9	29
EDUCATION	0	0	4	16	16	36
BSBA	0	1	16	19	5	41
BSCRIM	0	1	11	12	5	29
BSHTM	3	1	13	17	13	47

Question 11: To what extent do you agree that a web-based system would reduce the time spent searching for thesis documents?

DEPARTMENT	STRONGLY DISAGREE	DISAGREE	NEUTRAL	AGREE	STRONGLY AGREE	TOTAL
BSIT	0	1	11	10	7	29
EDUCATION	0	0	18	15	3	36
BSBA	0	1	11	20	9	41
BSCRIM	0	2	10	12	5	29
BSHTM	4	2	13	18	10	47

Question 12: Access to full thesis contents should be restricted to authorized users only.

DEPARTMENT	STRONGLY DISAGREE	DISAGREE	NEUTRAL	AGREE	STRONGLY AGREE	TOTAL
BSIT	0	0	8	16	5	29
EDUCATION	0	1	11	16	8	36
BSBA	0	3	11	18	9	41
BSCRIM	0	2	10	12	5	29
BSHTM	0	3	14	17	13	47

Question 13: The system should provide approval notifications and allow users to view comments and revision requests.

DEPARTMENT	STRONGLY DISAGREE	DISAGREE	NEUTRAL	AGREE	STRONGLY AGREE	TOTAL
BSIT	0	0	9	15	5	29
EDUCATION	0	0	4	27	5	36
BSBA	0	3	15	18	5	42
BSCRIM	0	0	8	6	15	29
BSHTM	3	3	11	20	10	47

COMBINE DATA (STUDENTS)

Question 3: Have you ever used Google Drive or any other online document storage service?

Response	Frequency	Percentage
Yes	178	98%
No	4	2%

Interpretation : The results show that 98% of the respondents have used online document storage services such as Google Drive, while only 2% have not. This indicates that the majority of respondents are already familiar with online storage platforms, demonstrating readiness and capability to use a web-based thesis archiving system.

Question 4: How many hours per day do you use the internet?

Response	Frequency	Percentage
Less than 1 hour	29	16
1-3 hours	70	38
4-6 hours	38	21
6 hours above	45	25

Interpretation : The findings show that most respondents have moderate to high daily internet usage, supporting the feasibility of implementing an online thesis archiving system that requires consistent internet access.

Question 5: Do you prefer viewing theses in a web-based archiving system?

Response	Frequency	Percentage
Yes	150	82%
No	32	18%

Interpretation : The findings reveal that a significant proportion of respondents (82%) prefer viewing theses through a web-based archiving system, while 18% do not prefer this method. This indicates a strong acceptance of digital access to thesis documents among the respondents. The results support the implementation of the proposed system as it aligns with user preference for online accessibility and digital document management.

Question 6: Do you prefer students to upload their theses online?

Response	Frequency	Percentage
Yes	144	79%
No	38	21%

Interpretation : Based on the results, most of the respondents prefer students to upload their theses online, as reflected by the 79% who answered “Yes.” This shows that there is strong support for implementing online thesis submission, indicating that respondents are open to adopting digital methods for thesis archiving.

Question 7 : Should the system track who downloaded the thesis?

Response	Frequency	Percentage
Yes	152	82%
No	30	18%

Interpretation : The results show that the majority of respondents (82%) agree that the system should track who downloads the thesis, while 18% do not support this feature. This indicates strong support for implementing a download tracking mechanism to enhance accountability, monitoring, and security within the proposed web-based thesis archiving system.

INTERPRETATION SCALE

Mean Range	Interpretation
1.00 - 1.80	STRONGLY DISAGREE
1.81 - 2.60	DISAGREE
2.61 - 3.40	NEUTRAL
3.41 – 4.20	AGREE
4.21 – 5.00	STRONGLY AGREE

Question 8 : Using digital thesis archiving enhances the protection of research papers from physical damage or loss while improving accessibility.

Response	Scale Value(x)	Frequency(f)	fx
Strongly Disagree	1	1	1
Disagree	2	7	14
Neutral	3	70	210
Agree	4	82	328
Strongly Agree	5	22	110
	Total:	182	663

Interpretation: The computed weighted mean of 3.6 falls within the “Agree” range based on the interpretation scale. This indicates that most respondents agree that digital thesis archiving enhances the protection of research papers from physical damage or loss while improving accessibility, demonstrating strong support for the implementation of the proposed system.

Question 9: I am concerned that my thesis could be plagiarized- if uploaded to an online system.

Response	Scale Value(x)	Frequency(f)	fxx
Strongly Disagree	1	1	1
Disagree	2	18	36
Neutral	3	64	192
Agree	4	75	300
Strongly Agree	5	24	120
	Total:	182	649

Interpretation : The computed mean of 3.6 indicates agreement among respondents that plagiarism is a concern in online thesis uploading, supporting the need for enhanced security features in the system.

Question 10: The system should include built-in plagiarism detection and protection features.

Response	Scale Value(x)	Frequency(f)	fxx
Strongly Disagree	1	3	3
Disagree	2	4	8
Neutral	3	49	147
Agree	4	78	312
Strongly Agree	5	48	240
	Total:	182	710

Interpretation: With a weighted mean of 3.9, the results show strong agreement among respondents that the system should include built-in plagiarism detection and protection features. This suggests high demand for security functionalities to prevent plagiarism and protect thesis content within the proposed web-based system.

Question 11: To what extent do you agree that a web-based system would reduce the time spent searching for thesis documents?

Response	Scale Value(x)	Frequency(f)	fxx
Strongly Disagree	1	4	4
Disagree	2	6	12
Neutral	3	63	189
Agree	4	75	300
Strongly Agree	5	34	170
	Total:	182	675

Interpretation: The computed weighted mean of 3.7 falls within the “Agree” range. This indicates that respondents generally agree that a web-based system would reduce the time spent searching for thesis documents, supporting the efficiency advantage of the proposed system.

Question 12: Access to full thesis contents should be restricted to authorized users only.

Response	Scale Value(x)	Frequency(f)	fxx
Strongly Disagree	1	0	0
Disagree	2	9	18
Neutral	3	54	162
Agree	4	79	316
Strongly Agree	5	40	200
	Total:	182	696

Interpretation : With a weighted mean of 3.8, the findings show that respondents support restricting full thesis access to authorized users. This highlights the necessity of implementing user authentication and access control mechanisms to ensure confidentiality and proper management of academic documents.

Question 13: The system should provide approval notifications and allow users to view comments and revision requests.

Response	Scale Value(x)	Frequency(f)	fxx
Strongly Disagree	1	3	3
Disagree	2	6	12
Neutral	3	47	141
Agree	4	86	344
Strongly Agree	5	40	200
	Total:	182	700

Interpretation : The computed weighted mean of 3.8 falls within the Agree range. This indicates that respondents generally agree that the system should provide approval notifications and allow users to view comments and revision requests, emphasizing the importance of communication and workflow management features in the proposed system.

Question 3: Submitting theses through an online platform enhances accessibility and document retrieval.

Response	Scale Value(x)	Frequency(f)	fxx
Strongly Disagree	1	0	0
Disagree	2	0	0
Neutral	3	0	0
Agree	4	4	16
Strongly Agree	5	4	20
	Total:	8	36

Interpretation: With a weighted mean of 4.5, the findings indicate strong agreement that online thesis submission improves accessibility and document retrieval.

Question 4. Relying solely on hardbound copies without a backup system makes thesis data vulnerable to loss or damage limits accessibility.

Response	Scale Value(x)	Frequency(f)	fxx
Strongly Disagree	1	0	0
Disagree	2	0	0
Neutral	3	0	0
Agree	4	3	12
Strongly Agree	5	5	25
	Total:	8	37

Interpretation : The computed weighted mean of 4.63 indicates strong agreement among faculty respondents that relying solely on hardbound copies without a backup system makes thesis data vulnerable to loss or damage and limits accessibility. This emphasizes the need for a digital backup and archiving system.

Question 5. Implementing a web-based thesis archiving system improves the organization of records.

Response	Scale Value(x)	Frequency(f)	fxx
Strongly Disagree	1	0	0
Disagree	2	0	0
Neutral	3	0	0
Agree	4	3	12
Strongly Agree	5	5	25
	Total:	8	37

Interpretation: The strong agreement reflected by the weighted mean of 4.63 suggests that faculty respondents acknowledge the importance of transitioning to a digital system to improve record organization, accessibility, and management efficiency.

Question 6. Role-based access control should be implemented in the system to manage user

Response	Scale Value(x)	Frequency(f)	fxx
Strongly Disagree	1	0	0
Disagree	2	0	0
Neutral	3	0	0
Agree	4	4	16
Strongly Agree	5	4	20
	Total:	8	36

Interpretation : The computed weighted mean of 4.5 indicates strong agreement among research adviser respondents that role-based access control should be implemented to manage user permissions. This suggests strong support for incorporating access control mechanisms to enhance system security and user management.

Question 7. The system should provide submission notifications and support revision requests and comment feedback.

Response	Scale Value(x)	Frequency(f)	fxx
Strongly Disagree	1	0	0
Disagree	2	0	0
Neutral	3	0	0
Agree	4	2	8
Strongly Agree	5	6	30
	Total:	8	38

Interpretation: The computed weighted mean of 4.75 indicates strong agreement among research adviser respondents that the system should provide submission notifications and support revision requests with comment feedback. This suggests that communication and interactive features are highly valued in the proposed system.
